

A Win-Win Partnership: Nutrition Bar Production Line for Serbia

Introducción detallada :

The global health food market is experiencing rapid growth, and nutrition bars have become a staple for health-conscious consumers worldwide. For manufacturers, success in this competitive landscape requires not only high-quality ingredients but also efficient, reliable, and versatile production technology. At Shandong Loyal Industrial Co., Ltd., we specialize in bridging the gap between raw grains and finished market-ready products by providing advanced industrial solutions tailored to international standards. Our recent collaboration with a Serbian partner highlights our commitment to delivering technical excellence while maximizing economic value through strategic policy utilization. In September 2025, Shandong Loyal Industrial Co., Ltd. received an inquiry from a food manufacturer in Serbia who planned to build an automated nutrition bar production line that would use grains, nuts, and other materials as ingredients. The client had strict requirements for equipment stability, output efficiency, and after-sales support. Through communication with our engineering team, we quickly grasped his requirements, always providing the correct solutions. Finally, the Serbian client chose us as their partner, trusting our professional strength and service commitment.

Our customer chose a comprehensive, high-performance, and multifunctional production line for processing nutrition bars, including raw material mixing, a cereal bar shaping and cutting machine, and a packing machine. This line is compatible with a wide variety of raw materials—including nuts, grains, and more—and the capacity can reach 100 to 300 kg per hour. Before shipment, our production team rigorously checked every stage of the manufacturing process to ensure the highest quality of the equipment. To help the client reduce costs, we initiated an initiative to assist in applying for the China-Serbia Free Trade Agreement Certificate of Origin. Our professional team prepared complete documents, accurately filling in product information, HS code 843880, and origin information. We successfully obtained a preferential Certificate of Origin. With this certificate, the client was able to enjoy

substantial tariff reductions during importation, helping our customer lower their customs clearance costs.

The equipment was shipped on January 1, 2026, via Rijeka, Croatia, to Belgrade Port, Serbia. Throughout the process, we provided full tracking services. After the machinery arrived in Serbia, our after-sales engineers provided quick, hands-on guidance throughout the installation, commissioning, and training of the customer's workers so the client start their business quickly. The client spoke highly of both our product quality and our attentive service. Moreover, the tariff savings realized through the use of the preferential Certificate of Origin directly enhanced the overall profitability of the project.

This cooperation is a vivid practice of the China-Serbia Free Trade Agreement. Relying on high-quality products, professional services, and policy dividends, we have established a long-term, stable partnership with our Serbian client. If you are also looking to invest in food processing equipment, feel free to share your ideas with us, and we will match the best solution for you.

This successful project in Serbia reinforces our position as a leader in the international B2B food machinery market. By combining advanced engineering with a deep understanding of international trade policies, we provide our clients with a competitive edge that goes beyond mere hardware. Whether you are looking to process special alloys, construction machinery, or nutritional food products, Shandong Loyal Industrial Co., Ltd. remains dedicated to your global success through innovation, transparency, and professional integrity. We invite manufacturers from all industrial sectors to explore how our tailored solutions can optimize your production architecture and drive your business forward in the target US and European markets.
