

# What Is Bread Crumbs Line Technology?

Introducción detallada :

Introduction Of Bread Crumbs Making Machine:

Bread crumbs making machine is a special machine that is used to create bread crumbs used in cooking and baking. The machine works by processing sliced bread into crumbs of various textures and sizes, making it a useful tool for those who need to create bread crumbs in large quantities. It typically includes a slicing and grinding unit that grinds the bread slices into small crumbs of uniform size and shape. Some advanced models also come with an automated drying system that ensures the bread crumbs are dried and crisp before storage. Bread crumbs making machines are commonly used in bakeries, food processing plants, restaurants, and home kitchens as well. They are available in different sizes and capacities to meet different needs.

The Production Line Details

|              |                                                                        |
|--------------|------------------------------------------------------------------------|
| Capacity     | 120kg-1000kg                                                           |
| Power Supply | Based On 380V 50 Hz 3 Phase. Customized According To Your Local Power. |

|                 |                                                                                                                                  |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------|
| Machine Details | 1.Stainless Steel,:201, 304, 316, On Request<br>2. Electric Parts Can Be Abb, Delta, Fuji, Siemens; Famous Brand As Your Demand. |
| Certificate     | Ce,Gost,Tuv,Bv                                                                                                                   |
| Raw Material    | Wheat Flour, Corn, Rice, Oat, Etc.                                                                                               |
| Products Color  | White, Yellow                                                                                                                    |
| Products Type   | Particle, Needle, Rings, Pillows Shape, Triangles, Curls Shape, Etc.                                                             |

### Flow Chart Of Commercial Bread Crumbs Processing Line:

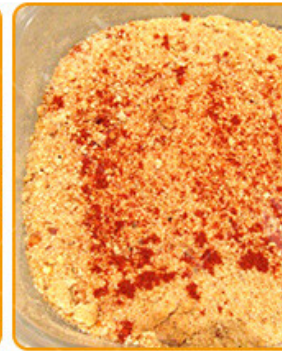

Flour Mixer- Screw Hoister- Twin Screw Extruder- Muti Functional Sharper- Hoister- Crumb Machine- Oven

### The Equipment Using In The Bread Crumb Making Machine:

1.Mixing 2.Screw Conveyor 3.Twin Screw Extruder 4.Pulling And Cutting Machine 5.Hoister 6.Multi-Oven 7.Hoister 8.Crush Machine 9.Viberate Sizer

### Feature Of Automatically Bread Crumbs Machines:

1. Automated Operation: The machine is fully automated.
2. High Productivity: The machine has a high output capacity, and it can produce large quantities of bread crumbs within a short time.
3. Easy To Clean: The machine is easy to clean and maintain, requiring minimal maintenance.
4. Safety Features: The machine is equipped with safety features such as emergency stop buttons and safety guards to prevent accidents.
5. Energy Efficient: The machine is designed to be energy efficient, reducing energy consumption and operating costs.

### Parameter Of Bread Crumb Machine:

| Model     | Installed Power (KW) | Power Consumption (kw) | Capacity (kg/h) | Dimension (m) |
|-----------|----------------------|------------------------|-----------------|---------------|
| Ly65 Line | 74                   | 53                     | 120-150kg/h     | 17*1.2*2.2    |
| Ly70 Line | 95                   | 76                     | 200-240kg/h     | 20*1.5*2.2    |
| Ly85 Line | 139                  | 117                    | 400-500kg/h     | 28*3.5*4.3    |

### Applications Of Automatic Bread Crumb Production Line:

|   |                                   |                                                                                                                           |
|---|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| 1 | Food Processing Industry          | The food processing industry uses bread crumbs in various food products such as meat products, fish products, and snacks. |
| 2 | Restaurants And Catering Services | Restaurants and catering services use bread crumbs as an essential ingredient in cooking and baking.                      |
| 3 | Fast Food Industry                | An automated bread crumb production line provides them with a continuous supply of fresh bread crumbs.                    |
| 4 | Bakery Industry                   | The bakery industry can use an automatic bread crumb production line to make bread crumbs from stale bread.               |
