

Macaroni production equipment

Detail Introduction :

Loyal Fully automatic macaroni pasta making machine is a high-automatic processing line for macaroni suppliers to produce high-quality pasta and macaroni with perfect taste and various shapes.

Macaroni and pasta food production line is a kind of food which takes flour, corn starch and potato starch as raw materials and is extruded, matured, shaped and dried. This production line can produce macaroni, spaghetti products, and can replace molds to produce products with unique shapes. The product can be used for cooking or frying, and is suitable for daily diet, restaurants, etc.
